During the preparation of this article, owing to an administrative oversight between the collaborating institutions, we omitted Dr Dermot Maher from the author list. Dr Maher was involved in the early phases of the General Population Cohort (GPC) Study, data from which were used in the individual-level participant data analyses in this manuscript. His role included contributing to the GPC study protocol development, management of initial research ethics application for the GPC, and organisation of initial field programmes at MRC/UVRI Uganda Research Unit on AIDS.

As a result, we request that Dr Maher is included in the author list. This results in the following correction:
